

**25<sup>th</sup> March 2020**

**Current Force** supply important spares and supplies to commercial premises and institutions (including hospitals) ensuring the uninterrupted operation and the continued Health and Safety of the building occupants and visitors. We intend to continue to do so, enabling critical infrastructure to be kept up and running.

We have implemented plans to ensure our business continues to operate as normally as possible at this difficult time and are closely monitoring the latest medical and government advice to ensure that our teams are protected and supported.

Essential services are being maintained from our offices in South London to facilitate deliveries from our warehouse and from our suppliers. Measures have been put in place to protect our staff and we thank them for their dedication and professionalism at this difficult time, their wellbeing is our priority.

**To our customers:** We will do our best to help you keep essential services working while ensuring your staff and ours are kept safe. There will be delays in deliveries due to quarantine measures and staff availability at our many suppliers, but our office does remain open.

As most of our Customers are aware, we do not carry stock due to the wide breadth of products supplied as such, we do not operate a trade counter and all enquiries are via Phone or email.

Although there has been some impact on most of our supply chains, we have noticed that supplies of PPE & Hygiene products are particularly difficult to source at this time.

**To our suppliers:** Thank you for your support and we know that we can rely upon you to do everything possible to maintain continuity of essential supplies. Routine month end payments have already been scheduled for March and we will pay our bills on time as normal.

These are unique times for us all and we will continue to monitor the situation over the coming days and weeks and will send out any updates as the changing situation demands. We will keep our website updated with our latest news.

Meantime, please follow the latest Government health advice and guidance on social distancing - which can be found by searching [Public Health England](#) and through the [NHS](#) - and stay safe.

We wish you and your colleagues good health during these unprecedented circumstances.

Kind regards,

Keith Poulton  
Managing Director  
Current Force
